

ENGINEERING BULLETIN

Ref Document No.	EB13006	Issue No.	1
Subject	Particulate Filter Housing		
Release Date	11th November 2013		

Purpose – Advise machine owner’s potential areas of improvement.

Applicability – All in service COALTRAM® models – CT08 / CT10 / CT13

Background

The PPK technical department has been made aware of reduced particulate filter life caused by water soak of the filter media.

Investigations/Findings

PPK has developed a new particulate filter housing that has been designed to reduce the amount of water ingress to the filter media.

Testing has been completed showing a marked improvement in filter life.

Recommendations

1. To extend filter life and reduce vehicle running cost it is recommended that vehicle owners retrofit the new design filter housing.
2. The component will be available from January 2014.
