

ENGINEERING BULLETIN

Ref Document No.	EB20004	Issue No.	1
Subject	COALTRAM® Electrical Cable Protection Sleeves		
Release Date	29 th July 2020		

Purpose – Advise COALTRAM® owners/operators of an update to the type and colour of protective sleeve used over electrical cables, including the HEUI pump and injector coils.

Applicability – All in service COALTRAM® models – CT08, CT10, CT10LP

Information

To help distinguish the protective sleeving covering the injector coil and HEUI pump cables from other equipment such as hydraulic hosing, the sleeves will now be yellow in colour.

The sleeving is still made from a high abrasion-resistant material and is labelled with the PPK logo.

Recommendations

PPK recommend that machine operators and service personnel be made aware that newly supplied electrical cable protection sleeves will be yellow. This includes the HEUI pump and injector coil cables.
