

ENGINEERING BULLETIN

Ref Document No.	EB18003	Issue No.	1
Subject	MONEx Piezo Actuated Valve Parts Consolidation		
Release Date	2018-06-21		

Purpose

To better service COALTRAM® customers and reduce stock requirements for both PPK and end users, PPK are consolidating some of the MONEx part numbers.

Applicability

In service COALTRAM® models – CT08, CT10, CT10LP & CT13

Information

The MONEx system is utilised for the engine management and shutdown functions on all COALTRAM®'s. This document serves as a change management notice to utilise 5520000592 Pneumatic Isolation Valve as defined per below.

Piezo Actuated Valve

The piezo actuated valves are all certified under the same certified part number (Cert. Part #12509). PPK will now only be supplying one piezo actuated valve for all applications. The existing variations are listed in table 2 below.

5520000592	Pneumatic Isolation Valve
5520001208	Engine Start Valve
5520001209	Rig Bolter Pilot Actuator Valve

Table 1

The 5520000592 part has been revised in operation to meet the same functionality as the 5520001208 & 5520001209 parts. When existing stock is depleted PPK will only be supplying piezo actuated valves under 5520000592. Any orders received for superseded part numbers will be supplied with 5520000592.

Recommendations

PPK recommend customers carrying MONEx spares inform their stores, purchasing departments and maintenance personnel of the changes listed in this bulletin.
