

# SAFETY BULLETIN

Ref Document No.	SB20001	Issue No.	1
Subject	Non-conforming Fuel Shutdown Cylinders		
Release Date	14 <sup>th</sup> August 2020		

**Purpose** - To advise customers of non-conforming fuel shutdown cylinders sold by PPK.

**Applicability** - All A2U220221043 fuel shutdown cylinders supplied by PPK between November 2014 and August 2019.

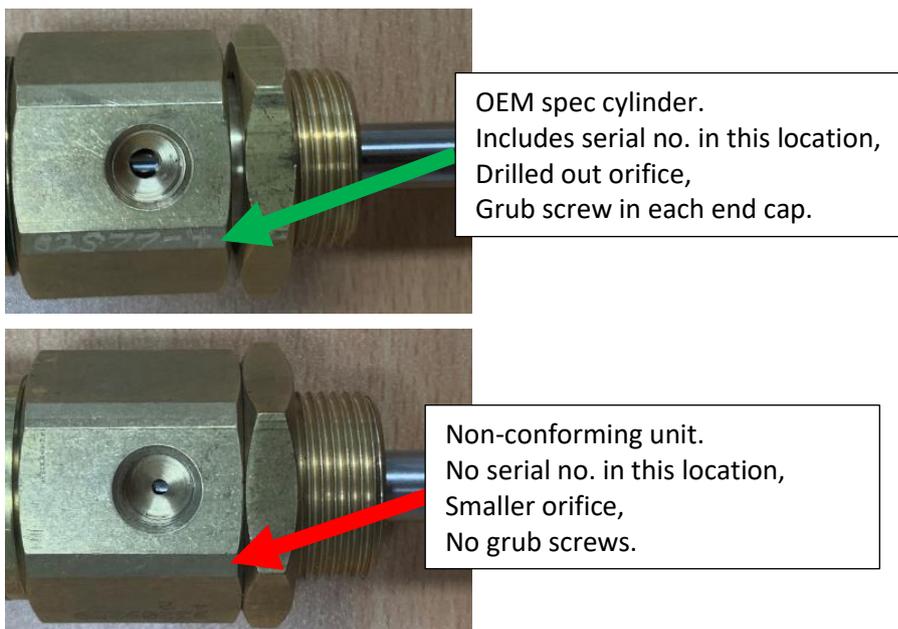

**Details**

The non-conformances include, but may not be limited to:

- Port orifice is smaller than OEM spec.
- Spring may be different.
- Missing two grub screws to hold end caps in place.

These non-conformances have safety implications as they may results in differences in the function and performance of the units.

A comparison of the conforming and non-conforming units is shown below:

### Recommendations

PPK recommend that any stocked or in-service units which may have been purchased from PPK during the dates specified be inspected to ensure they meet Original Equipment Manufacturer specification.
